# COOLRIG™

## On-Site Durability

Vallen now offers a unique cool-down trailer that meets OSHA heat-stress management guidelines. This life-saving trailer is created with patented CellTech Technology, making it the toughest trailer on the planet. CoolRig's all-metal, anti-corrosion design eliminates rot and is built to withstand the harshest summer conditions.

## Quick View

- **Enclosed trailer 7' x 16'**
- **All metal construction**
- **Two-15 BTU air conditioners**
- **Two-18 ft secured benches**
- **8-AC plugs (charging stations)**
- **115sq. ft. non-skid floor space**
- **Meets all DOT requirements**

## Dangers of Working in the Heat

Every year, thousands of employees become ill while working in hot and humid conditions; worse yet, dozens of these workers die from these conditions. Over 40% of these heat-related deaths occur in construction-related industries; however, all outdoor laborers are susceptible. Heat associated illnesses can affect anyone, regardless of age or physical condition.

## Employers Have a Stewardship to Protect Workers

According to OSHA, employers must provide a safe, hazard-free workplace and environment, which includes a comprehensive heat illness prevention plan, and is required to protect workers exposed to high temperatures. Employers are required to:

- Provide employees with rest, water, and shade
- Allow new and returning workers to slowly increase workloads, taking frequent breaks to acclimate to the heat
- Plan for emergencies and provide heat-prevention training
- Monitor workers for signs of heat-related illness

## The #1 Request from Customers: Reduce Maintenance

Ongoing maintenance of onsite equipment can be time-consuming, frustrating and costly. The CoolRig has solved this problem with perhaps the most maintenance-free cool-down trailer on the market.

## Why Quality Matters

*Simply put, quality reduces liability.* By installing best-in-class cool-down trailers, you'll protect your employees and your corporate interests. The CoolRig offers:

- **Quality Components:** All-metal trailers eliminate rot, reduce mildew, and increase longevity.
- **Quality Design:** Designed from the ground up with features that safeguard your employees.
- **Quality Experience:** Comfortably cools down 18 workers—while charging their phones.

## Call Your Representative for Additional Information.
